DESCRIPTORS Data Processing, *Engineering Technicians, Enrollment Trends, *Industrial Technology, *Manpower Utilization, *Statistical Surveys, *Tables (Data)

ABSTRACT

Engineering and technician enrollments for Fall 1969 are reported for associate and bachelor's degree programs in engineering technology and industrial technology, and for engineering degrees at the bachelor's, master's, and doctor's levels. Statistical tables were produced by a computer analysis of data from 269 engineering schools and 558 other technical institutions. The data tables include engineering enrollments by school year and major curriculum groups for all schools combined, and enrollments by school year and institution. This report should be useful to employers and educators interested in identifying future sources of engineering and technical manpower in the various technical disciplines. (Author/GEB)

ENGINEERS JOINT COUNCIL

Engineers Joint Council (founded in 1941 and incorporated in 1958) is an organization of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

- a) Provide for regular and orderly communications among its member societies.
- b) Act as an advisory and coordinating agency for member society activities, as mutually agreed.
- c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.
- d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.
- e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.
- f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.
- g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION
OF ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1951 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

EMC OFFICERS AND STAFF

William Hazell	Chairman
Walter M. Carleton	Vice-Chairman
John D. Alden	Executive Secretary

ACKNOWLEDGMENTS

The essential contributors to this report were, of course, the deans, registrars, and other individuals who provided the data on enrollments in their schools. The Engineering Manpower Commission is grateful for their continued cooperation in making this survey a success.

Thanks are also due to the American Society for Engineering Education for encouraging and assisting EMC in carrying out the survey. In particular we recognize the contributions of Alfred D. Ingersoll, Frederick E. Terman, William K. Lebold, W. Leighton Collins, Leslie B. Williams, and Ella H. Wright in helping to plan and organize the survey and report.

The survey was conducted under the overall direction of John D. Alden, Executive Secretary of the Engineering Manpower Commission, and Richard C. Fremon, Chairman of the EMC Surveys Committee. Miss Carol Iceland did most of the work involved in obtaining, checking, and preparing the data for computer processing.

ENGINEERING AND TECHNICIAN ENROLLMENTS, FALL 1969

Introduction

This publication reports engineering and technician enrollments for fall 1969 as surveyed by the Engineering Manpower Commission of Engineers Joint Council.

EMC undertook these surveys in 1967 because of its belief that accurate and timely educational statistics are essential to engineering manpower planning and analysis. Associate and bachelor's degree programs in engineering technology and industrial technology fill an important role in the technical manpower picture and are therefore included in this enrollment Survey along with engineering degrees at the bachelor's, master's, and doctor's levels.

This particular report is designed especially for use by employers and educators interested in identifying future sources of engineering and technological manpower in the various technical disciplines. The bulk of its pages are devoted to statistical tables produced by a computer analysis of data from 269 engineering schools and 558 other technical institutions. Users should read carefully the explanations of the data tables before attempting to use this report.

Although we have made every effort to eliminate errors, some minor discrepancies usually creep into complex tabulations such as this one. In some cases we have had to correct inconsistencies in the figures as they were reported to us, and frequently we have had to abbreviate curriculum titles or group related curricula under a common title in order to make the statistics manageable. Users should therefore contact the specific institution to obtain exact, up to date information on curriculum content and enrollments in programs of possible interest.

The Engineering Enrollment Survey

Questionnaires were sent last fall to all known engineering schools in the United States, and replies were received from 263 of them. For six additional schools, constituting less than one percent of total engineering enrollments, we have made estimates on the basis of previous years' data. A few schools were unable to break down their data exactly as required for this report. In such cases we have made whatever estimates were necessary to conform the data to our standard reporting format. Minor adjustments were also needed to reconcile the arithmetic in a few cases.

This year EMC decided to computerize the enrollment report despite the knowledge that it would delay publication somewhat. In return for this delay, and the expenditure of considerable time and effort, we have arrived at an improved format and a system that will greatly expedite future reports.

Explanation of Data Tables

The following kinds of data tables are included in this report:

Engineering enrollments by school year and major curriculum groups, for all schools combined.

Enrollments by school year and institution. The table for all curricula combined includes subtotals for each state. Detailed tables list enrollments by institution for each major curriculum.

Additional explanatory notes will be found at the beginning of each set of tables. However, some features are common to all tables. In the breakdown by school year, the figures for the first five undergraduate years are for full-time students only. All part-time degree enrollments are combined in one column regardless of the student's academic progress. Where schools submitted figures for full and part-time enrollments combined, we deducted the part-time students from the first through fifth year totals on a pro-rata basis.

Advanced degree enrollments were counted as either full or part-time under the heading of master's or doctor's degrees. Students working toward engineer (professional) degrees were counted with master's to simplify the report. In a few cases where schools reported combined totals, we had to pro-rate the figures on the basis of our best estimate in order to accommodate the data to the computer program.

All totals and subtotals have been cross-checked by the computer and verified both by row and by column. Hopefully no key punch errors have escaped detection.

The last column on the right is for graduate students who are foreign nationals. This figure includes both master's and doctor's degree enrollments, full and part-time. Because of limitations in the computer program, a zero in this column can mean either that the school had no foreign graduate students or that it was unable to report such information.

New Identification Code

To assist users in evaluating the data, a number-letter code has been added after each school. The number gives information about the affiliation of the institution or accreditation of the curriculum, while the letter indicates control of the school, as follows:

Number codes:

- 1 Curriculum accredited by the Engineers' Council for Professional Development. (This code is used only in the tables by individual curriculum. Where ECPD accreditation is indicated, this usually applies only to the bachelor's or first professional degree and in some cases may not apply to all programs having the same title. For specific information refer to the 1969 ECPD lists of accredited curricula in engineering and engineering technology.)

- 2 School has at least one curriculum accredited by ECPD, as of the 1969 Annual Report.
- 3 School is a member or affiliate of the American Society for Engineering Education, but is not in category 2 above.
- 4 School is listed as accredited, candidate, or correspondent in the 1969-70 report of the Federation of Regional Accrediting Commissions of Higher Education, but is not in category 2 or 3 above.
- 5 School is listed in 1969-70 directory of the National Association of Trade and Technical Schools (applies to technician enrollment tables only).
- 0 None of the above. (When used in the tables by individual curriculum, zero indicates that the curriculum is not accredited by ECPD.)

Letter codes:

- F Federal government control
- P Private nonsectarian control
- R Religious control
- S State or local government control

The Technician Enrollment Survey

This report includes data from 558 schools offering technician or pre-engineering programs. Although this is the largest number we have ever reported, it cannot be considered to represent the total technician enrollment in the United States. There is no authoritative list of all schools offering such programs. We have tried to locate every such institution, but some schools surveyed did not reply to our questionnaire and new programs are being opened each year that we may not be aware of.

As in previous years we have made a point of obtaining replies from all schools having at least one technology curriculum accredited by the Engineers' Council for Professional Development. There were 52 such institutions on the 1969 ECPD list and all are included in this report.

Classification of Technician Programs

In previous surveys we attempted to separate curricula on the basis of engineering technology or industrial technology. In practice such a distinction is impossible to make without going into a detailed evaluation of each program in each school. Therefore we have grouped all curricula primarily according to their technical field. For example, all electronic programs are listed together, whether they were labeled electronic engineering technology, industrial electronics, electronic technology, or some other variant nomenclature.

The user can derive further information about a particular program

from the type of degree offered--associate, certificate, or bachelor's--and from the number-letter code after each school's name, as described earlier. Additional explanation of the technology curriculum groupings will be found at the beginning of the data tables.

Pre-engineering enrollments are listed as a separate curriculum but without further breakdown as to technical specialty. This is because previous surveys had indicated that most such programs were general in nature, although many students are undoubtedly oriented toward particular technical fields. It should be noted that there is a great deal of switching around in two-year courses. Although most associate degree and certificate programs are designed to be terminal in nature, many graduates continue on toward higher degrees. Similarly, many students who complete the first two years of an engineering transfer program never enroll in engineering schools.

Would-be employers are particularly advised to seek detailed information about curriculum content and the qualifications of technical school graduates from the institutions concerned. In the absence of effective national standards considerable variability can be expected among programs having similar titles. This report will, however, be an invaluable guide toward areas in which further investigation is warranted.

Engineering Curriculum Groups

For the table of Engineering Enrollments by Curriculum, statistics have been consolidated into 20 curriculum groups. These include some curricula that are reported separately in the detailed tables (indicated in capital letters) as well as other titles not listed separately. Headings that are not self-evident are described below.

AEROSPACE	incorporates aeronautical, astronautical, and similar titles.
BIOMEDICAL	incorporates bio-engineering and similar titles.
CIVIL	also includes CONSTRUCTION, ENGINEERING GRAPHICS, PLANNING, STRUCTURAL, and TRANSPORTATION.
ELECTRICAL	also includes COMMUNICATIONS, ELECTRONIC, and INSTRUMENTATION & CONTROL.
ENGINEERING SCIENCES	also includes COMPUTER SCIENCE, ENGINEERING MATHEMATICS, ENGINEERING MECHANICS, ENGINEERING PHYSICS, MISCELLANEOUS APPLIED SCIENCES, and titles similar to these.
ENVIRONMENTAL, SANITARY	also includes WATER RESOURCES and similar titles.
INDUSTRIAL, SYSTEMS	also includes ADMINISTRATIVE, FIRE PROTECTION, MANAGEMENT, MANUFACTURING, OPERATIONS RESEARCH, and titles similar to these.

MARINE, NAVAL ARCHITECT.	also includes OCEAN and NAVAL ENGINEERING.
MECHANICAL	also includes ENERGY CONVERSION and similar titles such as power.
METALLURGICAL, MATERIALS	also includes WELDING.
UNIFIED AND GENERAL	includes ENGINEERING, GENERAL ENGINEERING, and UNDIFFERENTIATED.
OTHER	includes OPTICS, PAPER, PRINTING, TEXTILE, SPECIAL STUDENTS, and OTHER (not otherwise specified).

Technology Curriculum Groups

For the table of Technology Enrollments by Curriculum, statistics have been consolidated into 20 curriculum groups. These are not the same as the combinations used for engineering enrollments. The consolidated groups include a number of curricula that are reported separately in the detailed tables (indicated in capital letters) as well as other titles not listed separately.

The categories of industrial engineering technology and industrial technology have caused much confusion in the past. To avoid this difficulty we have used the term Industrial Technology for such programs not otherwise specified as to technical area. Programs that would logically fall under one of the industrial engineering functions are grouped under the title of Manufacturing.

Headings that are not self-evident are described below.

AUTOMOTIVE	also includes INTERNAL COMBUSTION and similar titles such as diesel.
CHEMICAL	also includes PLASTICS.
CIVIL	also includes CONSTRUCTION, ENVIRONMENTAL, SANITARY, STRUCTURAL, SURVEYING, WATER RESOURCES, and similar titles.
ELECTRICAL	also includes ELECTROMECHANICAL and INSTRUMENTATION & CONTROL.
ELECTRONIC	also includes COMMUNICATIONS and similar titles such as broadcasting.
MANUFACTURING	also includes INDUSTRIAL ENGINEERING TECHNOLOGY, MANAGEMENT, QUALITY CONTROL, TOOL & DIE and similar titles.
MARINE	also includes OCEAN.

MECHANICAL	also includes ENERGY CONVERSION and similar titles such as power.
METALS, MATERIALS	includes METALLURGICAL, MATERIALS, and WELDING.
MINERAL	also includes MINING and PETROLEUM.
NUCLEAR	also includes RADIATION and similar titles.
PHYSICAL SCIENCES, MATHEMATICS	various titles are included under the heading of MISC. APPLIED SCIENCES.
OTHER	includes AGRICULTURAL (also forestry), FIRE PROTECTION, GENERAL, PAPER, PRE-TECHNOLOGY, PRINTING, UNDIFFERENTIATED, and OTHER (not otherwise specified).

TABLE 1

Full-Time Engineering Enrollments in Fall 1969, as Compared with 1967 and 1968

<u>Full-Time Engineering Students</u>	<u>Fall 1967</u>	<u>Fall 1968</u>	<u>Fall 1969</u>	<u>Percent Change 1968 - 1969</u>
Freshman Year	77,551	77,484	74,113	- 4.3
Sophomore Year	56,975	55,615	52,972	- 4.7
Junior Year	50,483	50,274	50,039	- 0.5
Senior Year	47,551	50,736	51,738	+ 2.0
Fifth Year	4,589	5,133	4,668	- 9.1
Total Undergraduates	237,149	239,242	233,530	- 2.4
Master's Degree	34,231	24,469	20,014	-18.2
Doctor's Degree	15,376	15,768	14,298	- 9.3
Total Graduate Students	49,607	40,237	34,312	-14.8

TABLE II

Enrollments in Engineering Technology Programs in Fall 1969 as Compared with 1967 and 1968(**)

<u>Engineering Technology Students</u>	<u>Fall 1967</u>	<u>Fall 1968</u>	<u>Fall 1969</u>	<u>Percent Change 1968 - 1969</u>
First Year, full-time(*)	13,877	13,459	18,479	+ 37.3
Second Year, full-time(*)	8,690	8,447	10,843	+ 28.4
Other full-time associate degree students	879	828	840	+ 1.4
Bachelor of Engineering Tech- nology students, third and later years, full-time	223	863	2,982	+ 246.
Total full-time students	23,669	23,597	33,144	+ 40.5
Total part-time students	5,636	3,955	9,697	+ 145.
Number of Schools Included(**)	38	44	52	NA

(*) Includes students in both associate and bachelor's degree programs for these years.

(**) All institutions having at least one technology curriculum accredited by the Engineers' Council for Professional Development at the time the survey was made. The Pennsylvania State University Commonwealth Campuses are counted as one institution.

TABLES OF ENGINEERING ENROLLMENTS

These tables are grouped to facilitate their use. The first two tables give combined enrollments in all curricula and in all schools. The tables by individual curriculum that follow are arranged in generally alphabetical order except for a few miscellaneous categories that are grouped at the end.

In using these tables to locate schools where particular programs are offered, note that closely related curricula may be listed under other names. Refer to the introduction for a full explanation of related curricula groupings and other information about the layout of the data tables.

The last three tables relate to special categories of engineering students--women, U.S. Negroes, and foreign nationals--and give the numbers of such students reported by the institutions participating in this survey.

TABLES OF TECHNOLOGY ENROLLMENTS

These tables are grouped to facilitate their use. The first two tables give combined enrollments in all curricula and in all schools. The tables by individual curriculum that follow are arranged in generally alphabetical order except for a few miscellaneous categories that are grouped at the end.

In using these tables to locate schools where particular programs are offered, note that closely related curricula may be listed under other names. Refer to the introduction for a full explanation of related curricula groupings and other information about the layout of the data tables.
